

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	MS: 2013_IJTDH_3416
Title of the Manuscript:	TREND AND SEASONALITY IN ADMISSION AND OUTCOME OF LOW BIRTHWEIGHT INFANTS IN GWAGWALADA-ABUJA, NIGERIA

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The paper is much improved and much clear, although some of the questions could not be answered, I think maybe they did not have that data. Sample description of age of infants is important as it helps understand their ages- were the LBW infants admitted first day, first week, first month of life. I understand it's about seasons and admissions, but one should ask, when in the LBW infant's life is this happening? If more tables are permitted by journal there is no problem of splitting Table 1, as first part shows months, second part shows months, are these all related to the years above, separation would give the two messages in a much better way. I suspect each year will be different #s so if you combine you should show numbers for each month for each year. If you split you do not have to change anything.
