

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2013_IJTDH_6670
Title of the Manuscript:	Can We Predict Postgraduate Dental Training Choice?; The Nigerian Experience

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I had raised the issue below: - The pre-testing procedure: a description of who carried out the pre-testing, state which hospital(s) where pre-testing was carried out and the number of participants during pre-testing is important. The response given "... tested among dentists in one of the Teaching Hospitals where the study was conducted". I still maintain that there is NO breach of confidentiality if the site was stated and the number of dentists used to validate the instrument. - Under Statistical Analysis, the sentence on factor analysis beginning with "The purpose of factor analysis here ..." I suggest that word "here" can be deleted without affecting the meaning of the sentence.
