SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1/.The conclusion are far reaching and the data does not completely support the conclusions arrived at. Conclusions are drawn from other published and confounders were not taken care of. 2/. Revisions in tables and graphs need to be done and may not meet the robustness of the journal.	The authors' derived their conclusion from the data and results drawn from this study. It agrees with published work by some authors, but does not agree with others. Confounders were taken care of, for instance the exclusion of every child with any obvious foci of infection, chronic illness, inflammatory disease, viral exanthema, as well as those with positive blood cultures. Tables and graphs have been displayed to show the various results derived.
<u>Minor</u> REVISION comments	Typos are essentially everywhere indicated in the manuscript and tenses need to match and be consistent (see manuscript)	The few typos have been noted and corrected. Tenses have been matched and made consistent.
<u>Optional/General</u> comments
