**PART 1: Review Comments**

|                                            | <b>Reviewer's comment</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)                                                                                |
|--------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | <ul style="list-style-type: none"> <li>- The introduction was well prepared and contains all the relevant information on the parasite and on the importance of the issue in the study area.</li> <li>- The authors should exchange methods for material and methods, as reported in the guideline author.</li> <li>- In respect the study area is not clear whether the Manengoteng region was investigated or was included due to the presence of individuals who came from this area.</li> <li>- There are many errors in the descriptions of references as the authors' names, and even year of publication. Authors should perform a careful review of the references.</li> </ul> | <ul style="list-style-type: none"> <li>-#Methods# was replaced by #Material and Methods#</li> <li>-Manengoteng was investigated as well as Manjo1. The two localities belong to Manjo health district.</li> <li>- the #References# was carefully edited.</li> </ul> |
| <b><u>Minor</u></b> REVISION comments      | <ul style="list-style-type: none"> <li>- Observe the units of measurement used in the description of the study area.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Corrections were made as requested.                                                                                                                                                                                                                                 |
| <b><u>Optional/General</u></b> comments    | <ul style="list-style-type: none"> <li>- This study is very interesting from the point of view of public health in Cameroon. Overall the paper was well prepared, but needs revision, particularly in the references.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                     |
