SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The paper is straightforward. The authors have tested the inhibitory capacity of garlic over selected fungi and bacteria. The experiments are sound but nothing new is found. What molecule from garlic is important is not determined. 1) Preparation of Sabouraud agar should be removed from the M &M section. 2) Was the methanol extract sterilized? 3) Line 96= Incomplete sentence 4) On line 117; Should have a comment regarding the fungal strains susceptibility. 5) To what refer the MIC in Fig.1? Lines 160-163? This is pure speculation.	1. Noted, it has been removed 2. No. 3. I have made correction, it is now complete. 4. It has been added 5. Minimum Inhibitory Concentration 6. noted
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
