SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	1. The authors have represented the data in tables and graphs with different statistical methods, done very nicely. 2. The authors should write introduction part more broadly and discuss the finding with latest reports in the discussion part. 3. The authors should include the latest references, as the cited ones are very old.	• Many thanks. We have done our best in this regard. • The discussion has been added to with more recent references; hence the introduction was left unchanged. This was done judiciously so as not to overly lengthen the paper. • Three more recent references have been added.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	1. The manuscript is very informative and will be useful to the scientific community.	• Many thanks.
