SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In abstract: Minor concerns: Results What does it mean? : The differences were significant ($p < 0.05$). Revision needs: "Number of participants with MS increased with increasing decade of age but reduced after 54 years, and increased from hypertension stages-normotension to hypertension. " In the abstract authors indicated the study type as cohort in full text it is indicated as cross-sectional survey??? 2.1 Study Design The study was a cross-sectional survey...	The whole manuscript has been rewritten with a fresh title and has taken care of all concerns. It is a cohort study. This has been reflected in the abstract and text
Minor REVISION comments	Why most of these traders were female?: 534 (170 males and 364 females)	This was the outcome of the study. Method of recruitment has been written clearly in the revised manuscript.
