**PART 1: Review Comments**

|                                            | Reviewer's comment                                                                                                                                                                            | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)                                |
|--------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | the various land use/cover types of an area.<br><b>Please explain on paragraph!, what do you mind about land use or cover types?</b>                                                          | Landuse/cover is a very common self-explanatory phrase in the environmental sciences disciplines. I don't imagine it requires further definition as it would only occupy additional space in the manuscript. |
| <b><u>Minor</u></b> REVISION comments      | What is NVDA<br>Please Explain on your competed statement about NVDA!                                                                                                                         | Correction done                                                                                                                                                                                              |
| <b><u>Optional/General</u></b> comments    | (water sources and storage facilities, housing 191 characteristics, bed net usage, dumpsites, water bodies, vegetation and agricultural fields) Please Arrange for clasification about there! | Not sure what is required to be done here.... The words are examples of socio-economic and ecological variables found in the study area.                                                                     |
