SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Research idea well-conceived and the style and method of reporting could be improved on. The manuscript is written in English that is very difficult to comprehend; I cannot follow what the author(s) is trying to say for most part of the write up. I will suggest that the manuscript be sent for language editing before the technical aspect could be reviewed. Also, the Methodology section i.e. sampling, isolation, identification & test for antibiotic susceptibility are not well systematically put together and most of the references cited are too old. The manuscript should undergo through revision and then the science in it and the impact will become obvious.	OK! Coming from French speaking country, English is sometime difficult for us. I'll asked to colleague to helps me in the redaction in English. I'll try to rewrite the article according to your remarks
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
