

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2014_IJTDH_12683
Title of the Manuscript:	Paediatric medical morbidity and mortality in a suburban hospital in Jos, North -central Nigeria

PART 2:

FINAL EVALUATOR’S comments on revised paper (if any) The key information in Table 4 should be summarized in few sentences (Lines 131-132). Then the entire Table 4 should be replaced with a figure. Please note that trends are more easily appreciated when presented pictorially, e.g. using a line graph. This graphical presentation can be done readily when monthly mortality rates are considered. You may follow the pattern suggested in the HYPOTHETICAL EXAMPLE below.  Fig 1: Trends of paediatric morbidities and mortalities in Vom over one year	Authors’ response to final evaluator’s comments Thank you. Corrections made: lines 131 – 137. Also table 4 has been replaced with figures 1 and 2. However I was unable to combine both frequencies of morbidities and mortalities and also percentage mortality rates on the same axes/ chart as depicted on the hypothetical example on the left. So I have one graph for frequencies of morbidities and mortalities; and another chart for percentage monthly mortality rates.
