

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2013_IJTDH_5864
Title of the Manuscript:	Increased High Density Lipoprotein Cholesterol and Total Cholesterol Levels in Traders with Metabolic Syndrome in an Apparently Healthy Nigerian Population

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
This revised manuscript reads well now and all the changes are acceptable. I just have a few comments and clarifications. The title of the manuscript is changed to Prevalent Components of Metabolic Syndrome and their Correlates in Apparently Healthy Individuals in Sub-Saharan Africa. But the rationale for changing the title is not mentioned though the new title is more appropriate for the study. Abstract looks pretty dense this time and reads well. However, in the last line of the abstract, African needs to be changed to African population. In the introduction, paragraph 2, line 6 from top, words dylipidaemia and dysglycemia need to be corrected. In the conclusion paragraph, a typographical error was noticed in the acronym FBG. It must be FPG. The paper may be accepted in its current form after all the minor corrections are made.	Thanks for your comments, which we appreciate so much. The title was changed to reflect changes effected on the manuscript due to major corrections suggested during the initial review. 'African Population' instead of 'African' has been effected in the abstract section. dylipidaemia and dysglycemia have been corrected to dyslipidemia and hyperglycemia respectively. FBG has been changed to FPG in the conclusion.
