Subject: RE: Request for final decision for manuscript number 2013/IJTDH/4183

Title: Is There Any Association Between Serum Lipid and Diabetic Retinopathy in Type 2 Diabetic Patients in Ghana?

The manuscript of IJTDH #4183 is not accepted without major revision. The authors carefully follow the editor's comment [9 comments] and correct/edit/revise the manuscript carefully and resubmit the revised manuscript.

Comments:

1] Authors should include page numbers. It is very difficult to indicate the location of corrections.

2] 4 lines above Results and Discussion;
Rewrite the sentence "Person data..." clearly or delete it

3] Tables 1-5 in Results;
Each report for the results in tables is very surface and poor. Carefully and explicitly interpret in detail.

4] Tables 6-7 in Results;
The interpretations of results are extremely poor and very simple. Tables 7-7 are related to the proof of the hypothesis. At the current stage of interpretations, the paper will not be accepted.
The contributions of Tables 6-7 are nil without explanations. If the authors cannot explain, delete the tables 6-7. Rewrite and develop the interpretation to prove the hypothesis for the results.

5] Please neatly and vertically align all statistical report at the decimal point except the statistical report with the standard deviations.

6] Table 1-7;
Please neatly and vertically align all statistical report at the decimal points.
In addition, do not write .016. Write 0.016. All reports should be consistent presentations.

7 Line 17th from the last sentence in Discussion;
Insert the reference #.

8 What is the policy implications? Clearly state the policy implications in the conclusions.

9 Authors need to add the conclusion in this text.
