SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	At certain points in discussion authors failed to make a point about the protocols followed in the construction of groups e.g. at certain places it has been mentioned that immunisation was done 14 or 21 days pre infection, whereas at other points it has been mentioned that immunisation was done for 14 or 21 days. Further instead of depicting the identity of each group every time authors should have mentioned group number, which could have made the manuscript a bit simple and easier for understanding of the readers.	
<u>Minor</u> REVISION comments	See the attached manuscript with suggestions and corrections please.	
<u>Optional/General</u> comments	The study carried out in the manuscript will be valuable for the readers of International Journal of Tropical Disease and Health. Presentation is good with only few errors. See attached manuscript for details. Was permission of the use of animals taken as per the laws prevailing?
