SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. It is important to describe whether those yeasts caused symptomatic infections (candiduria). A. If yes, what were those species and prevalence? What were the outcomes? B. If not, the title of the manuscript should be modified. 2. It would be informative to quantitate the amount of yeast in each urine sample in order to determine whether they are clinical significant. 3. It would be informative to investigate the risk factors for yeast colonization/infection. 4. With more data in the present study, the authors can discuss more about their findings with other previous reports in the section of discussion.	
<u>Minor</u> REVISION comments	1. Usually, the name of species should be italicized.	
<u>Optional/General</u> comments
