SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The results section needs some revision and I have stated the specific issues in the text. The tables must appear after the first point of reference in the text, so there is a need to revised this section. A brief about the results is required before or after the table. In the results there is mention of linear regression results but they are not transparent. In addition the regression model is not introduced in the methodology.	
<u>Minor</u> REVISION comments	There are places I have marked throughout the text which need revision. This also includes the last paragraph in the introduction / background to include a statement on objectives at the end and the current last paragraph to be an opening paragraph in the Methodology section.	
<u>Optional/General</u> comments	Good study but to improve the areas I have indicated
