1. TITLE: Suggestion: Possession, attitude, and perceptions of insecticide-treated bednets among pregnant women in a post conflict district in Northern Uganda. Is this acceptable? 2. ABSTRACT: --Background: Still states only ITN possession. Why? --Methods: No mention of where the work was carried out. --Results: Still lack information on attitudes and perceptions 3. GENERAL: The authors have revised the manuscript to the best of their ability. The manner in which the terms/tenses are combined to form sentences is still a very hard nut to crack. As a result, it will need extensive editing before publication.
