

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2014_IJTDH_11789
Title of the Manuscript:	Comparative efficacy of Amantadine Hydrochloride versus Amantadine Sulphate in treating Egyptian patients with chronic HCV

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The overall quality of the paper is greatly improved following the authors' response to the reviewers' comments. Few minor comments: 1- Table 1: Age, y-→ please define as "year" 2- In the authors' response, they said that" Seventy percent of the included patients were suffering from chronic obstructive pulmonary disease while thirty percent were suffering from poorly controlled diabetes." Please insert it in the methods (define patients with IFN contraindications) 3- Which is superior: amantadine HCL or sulphate: This needs comparison of the significances.
