SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Introduction: Excessive description of malaria. Reduce to a paragraph. Speaking of the regional malaria including species prevalence. In another paragraph talking about the HIV / AIDS prevalence. Finally talk about co-infection HIV Plasmodium References must be appropriate the journal's guidelines Discussion: talk about HIV co infection problems, considering relevance be a problem that needs to be investigated.	Agree in some areas. Attempt has been made to reduce the introduction as highlighted in yellow colour. The areas stressed by reviewer "Plasmodium" has been moved up to align with relevant part of the write up. In discussion, additional statement was input to reflect the co infection problems. This is in addition to the effect of HIV/ malaria on CD4⁺ T cells (a subset of cells), macrophages and dendritic cells that was stated in paragraph 2 of the introduction.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
