SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Please, explain method of sample size calculation. Flow chart for enrolment of the patients in the study is required to easy understanding the results. Study limitations should be extremely improved and it is required the widely discussion in the appropriate section.	The sample size calculation method was $n_f = \frac{n}{1 + \left(\frac{n}{N}\right)}$ nf= desired sample size, n= desired sample size when sample is more than 10000, N=the estimate of the population size. For the flow chart for enrolment in this study, all young persons with essential hypertension who met the inclusion criteria were included in the study.
<u>Optional/General</u> comments	Authors presented a well structured and good written paper.
