SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	I have reviewed the manuscript "Prediction of cholera incidence by using the Autoregressive Integrated Moving Average model" 2015_IJTDH_18115 ". Comments are as follow; 1. Some sections of the manuscript require redaction (indicated on the manuscript) 2. The introduction section is OK 3. I would ask to the authors if it is possible to show the real observations from ministry of health of Morocco and the predicted observations by the models all the time? It would allow to the readers to see the proximity level between the observations in numbers. 4. Titles of the tables and figures should be self-explicative. Authors should use the foot of the tables or figures to describe abbreviated information in the tables or figures. 5. In my opinion, this is a technically well-written manuscript.	Thank you for your comments 3. The ministry of health do not declare any case after 1995. This lack of surveillance of disease is the motivation to predict the cases after 1995. 4. We agree. Corrected.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
