Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2015_IJTDH_18410
Title of the Manuscript:	Usefulness of Various Biomarkers for the Differentiation of Bacterial from Viral Meningitis
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Great improvement from original manuscript. Reads in this revised from right to left which may be due to editorial changes from authors original language to english. please fix. Overall some language improvements that can be corrected by the editing staff. i.e.: Patients were excluded if they had received antibiotics in the past seven days or had co-existing morbidities as other diseases that cause impaired consciousness intracranial hemorrhage or malignancy. Informed signed consent was obtained from The authors need to either quantify what biomarkers and or elaborate their final sentence in discussion to make sense, which is...Other biochemical markers on a larger number of patients can be recommended.	Great thanks for the editorial changes Patients who had received antibiotics in the past seven days or had co-existing morbidities as other diseases that cause impaired consciousness as intracranial hemorrhage , brain tumor, cerebral malaria were excluded from the study. Informed signed consent was obtained from all participants Further study of biochemical markers as CSFlactate,serum procalcitonin ,IL-6, can be recommended on a larger number of patients
