SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Very nice study. Interesting findings.	The authors thank the reviewer for encouraging comments
<u>Minor</u> REVISION comments	Have a native speaker correcting spelling mistakes (not that many) Make sure that the species names are italic and the two word of the species are separated like <i>Rattusrattus</i> into <i>Rattus rattus</i> While most people have an understanding on what is domestic versus wild, readers might not know what peri-domestic means. Please include a brief definition of domestic, peri-domestic, and wild Finally, the authors mentioned to have identified Cornilurus albipes. However, this species is extinct for years and decades. If that is a true identification it would be worse another publication. I assume that the local name for it was translated into an English name, which then was translated into the Latin name. Please correct.	The grammer and spellings has been checked again by the authors Done Added Thanks. We are in process of another paper focussing on the same. Yes, the species local name was translated and retranslated.
<u>Optional/General</u> comments
