

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_18744
Title of the Manuscript:	Detection and species identification of malaria parasites by nested-PCR: comparison with light microscopy and with SD BIOLINE Malaria Ag test in Luanda, Angola.
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Author should address a few comments on table 5 added after revision (find comments at the Word file). - I don't understand this table. You don't have concordant by microscopy and nested PCR? I think you should write how many samples were positive by microscopy and nested or the species that were concordant, because only on SD Bioline you wrote some result... P. malariae - Choose one form and keep it through all the table: write Pf or P. falciparum - Plasmodium Italic	The Table 5 was modified according to the review suggestion. We wrote the results in each column. See the Table 5 in the manuscript. Was changed. P. malaria by P. malariae. We chose P. falciparum, was changed. Was done.
