| <b><u>Compulsory</u></b> REVISION comments | <p><b><u>Manuscript is needed Major Revision</u></b></p> <ul style="list-style-type: none"> <li>• <b><u>English grammar</u></b> is very poor that should be improved. The numbers less than ten should be spelled in text and avoid numeral.</li> <li>• The text is needed to format carefully because many words have not spacing e.g. line 85, 107, 126, 130, 136 etc. Similarly spelling mistakes were found e.g. in line 68 blending should be replaced with bleeding and also check in the whole text.</li> <li>• In conclusion section there is repetition of sentences that are in abstract or introduction. Conclusion should be clear, precise. Therefore, it should be rewritten.</li> <li>• Few abbreviations are used without their details e.g. in line 13 EVD. Similarly in line 40 UK. These should be completely spelled.</li> <li>• The text should be classified into main headings e.g. Antibodies, Anti-viral, Anti-inflammatory modulators, Anticoagulants and Others. Then each main heading should be divided into sub-headings like Antibodies into Convalescent Plasma, Immunoglobulins etc. Same pattern with other main headings. This will give better understanding to reader.</li> </ul> <p>Avoid unnecessary use of "the" like the RNA dependent RNA Polymerase, the WHO, etc.</p> | <p>English/grammar have been improved throughout the manuscript</p> <p>Spacing errors corrected throughout the manuscript. Spelling mistakes corrected</p> <p>Conclusion has been revised<br/>Acronyms defined at first use</p> <p>Manuscript sub-titled</p> <p>Errors corrected</p> |
| <b><u>Minor</u></b> REVISION comments      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                      |
