

Editorial Comments:

I would recommend making the following changes ... otherwise the manuscript is ready for publication.

TITLE -- Asymptomatic Blastocystis-infected persons as potential carriers of disease in Thailand

33 -- This study revealed that *Blastocystis* infected patients probably did not show obviously clinical symptoms in asymptomatic carriers, who can spread infections to others and environments.

Perhaps change wording to: This study revealed that Blastocystis-infected persons who do not show clinical symptoms may be capable of spreading infection to others.

Line 68—apparently

88 -- examined to identify Blastocystis spp. by routinely direct simple smear in 0.85% normal saline solution and 1% Lugol's iodine solution for double examination to increase yields of detection. (omit the word routinely)

152 -- significant pathogen remains unelucidated (change to uncertain).

174 - Border Petrolpolicemen (Patrol-policemen)

239 - CONCENT (should be CONSENT)

Informed consent was obtained from all the study participants.

Author's Feedback:

Thank you very much for editing some proper sentences and I have corrected as your suggestions.

1. I have followed the title as suggested.
2. Line 33, we have corrected as your suggestion and the first suggested paragraph seems suitable for our paper so we have decided to select the former one.
3. Line 68, the word apparently is now removed.
4. Line 88, we have already corrected.
5. Line 152, we have already changed to uncertain.
6. All Border Patrol-policemen words are now used on the places.
7. Line 239, the form of consent sentence is now followed as your suggestion.
