SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The topic of the manuscript is relevant "Evaluation of feeding practices in children aged 6-23 months in southern Benin rural setting". This study relates that feeding practices were inadequate in 73.9% of children in Benin. There are minor faults (the authors should have seen the weight and length of children to classify in malnutrition, lean and overweight; verify the use of formula milk, etc.; all this factors would improve the manuscript) but the manuscript can be published.	We would sincerely like to thank reviewers for their relevant and useful comments. Please find below the changes to the manuscript according the raised concerns. Corrections are highlighted in yellow according to reviewers' comments in the manuscript. We ad table 2 that summarizes nutritional status of children. The complete table is highlighted in yellow in manuscript. The formula milk is used by WHO (Brest milk) in "Indicators for assessing infant and young child feeding practices "and in others publications (Sera L Young, et al. Public Health Nutrition / Volume 13 / Issue 12 / December 2010, pp 2027 2033). Some faults corrected are highlighted in yellow
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
