

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	Ms_IJTDH_18726
Title of the Manuscript:	Enteric Viruses Association With Diarrhea in Young Children 0-24 Months in an Urban Secondary Health Center in Benin City, Nigeria.
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I have to express three points that could have been improved: 1. Title is long, twenty words. Although not commented previously, it could be improved. 2. It would have been welcome to read something in regards to prevention of diarrhea in general or viral diarrhea in particular in those children in Nigeria, once the etiology was known and not so focused on etiologic agents. Make the study and the discussion a bit more aggressive and forward. Still, there was 60% diarrhea that was not viral and they did not comment on that. Also, the authors did not spell the limitations of the study. 3. References do not conform to journal specifications. Some misspelling of journal names (Mem Inst Oswaldo Cruz Rio de Janeiro as example). Also, very few recent ones, in the last 5-7 years. Some journals like at least 50% of references in the last 5 years, especially on a rich topic as diarrhea.	(1). The title has been re-modified to 14 words. (2). Prevention of viral diarrhea in Nigeria has been added to the manuscript. Comments on the remaining 60% non-viral diarrhea has also been added. Limitation of the study was also spelt out. (3). Issues on references have been taken care of.
