

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2015_IJTDH_18115
Title of the Manuscript:	Prediction of cholera incidence by using the Autoregressive Integrated Moving Average model
New Title:	Prediction of cholera incidence by using the comparison of four models: Autoregressive Integrated Moving Average model, Holt model, Brown model and simple regression model
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I have reviewed again the manuscript "Prediction of cholera incidence by using the Autoregressive Integrated Moving Average model" 2015_IJTDH_18115 ". Comments are as follow; 1. Some sections of the manuscript require redaction (indicated on the manuscript). It was done 2. The introduction section is OK 3. I would ask to the authors if it is possible to show the real observations from ministry of health of Morocco and the predicted observations by the models all the time? It would allow to the readers to see the proximity level between the observations in numbers. Reason is explained bythe authors 4. Titles of the tables and figures should be self-explicative. Authors should use the foot of the tables or figures to describe abbreviated information in the tables or figures. It was done 5. In my opinion, this is a technically well-written manuscript.
