PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I have revised again the manuscript "Enteric Viruses Association With Diarrhea in Young Children 0-24 Months in an Urban Secondary Health Center in Benin City, Nigeria" Ms_IJTDH_18726. Answer to the recommendations are as follows: 1. Some sections of the manuscript are not clear and require new redaction (indicated on the manuscript. It was done 2. More local data about the infection is required in the introduction section and the problem should be highlighted, Authors explain the reasons 3. Authors should include the criteria selection for study children in the "Methods" section. It was done 4. It is not clear how did the authors analyze the data. Statistical advisement is required by an expertise. Comment were included in the manuscript: It was not done 5. Titles of the tables should be self-explicative. Tables should show what the authors are describing in the test. It was not done 6. Discussion is poor. More data for comparison should be included in the "Discussion" section. IT IS NOT CLEAR HOW THE STATISTICAL ASSOCIATIONS WERE DONE. Information about the statistical techniques used is compulsory to know with precision what the authors wanted to do really. Univariate and multivariate analysis s are recommended In my opinion the manuscript cannot be published in the current form
