SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The study is very important for the evaluation of public health strategies directed to people infected with HIV and TB. The study shows the successful results in the detection and treatment of HIV in TB patients after implementation of the revised the National TB / HIV guideline. In the introduction, the changes after the new guideline are evident. In the methodology, the study evaluated a large number of TB cases in a long time (one year in the pre-implementation period and the post implementation period). And the results were very interesting. The authors are to be congratulated for the study.	
<u>Minor</u> REVISION comments	Attention to punctuation marks in the abstract (page1). In the second paragraph (referring to the method), there is a period after the paragraph. In the third paragraph (on the results), there are two periods together.	
<u>Optional/General</u> comments
