SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	I do recommend the work " Antifungal effect of 7-hydroxycitronellal against <i>Candida albicans</i> strains" for publication in International Journal of Tropical Disease & Health because, but in my opinion should be considered the following items: - The author should give more details about the substances used as positive and negative controls and their MIC values. - The author should give more specifications about de Laboratory of Mycology from which were obtained the microorganism strains. - Once named the strain, it is not necessary to name it completely again. When first mentioned <i>Candida albicans</i>, on subsequent must name it as <i>C. albicans</i>. <i>Candida</i> and <i>Candida albicans</i> must always be written in italics. - The abbreviation of MIC and MFC must be unified. In the manuscript the author sometimes use CIM instead of MIC and CFM instead of MFC. - The references are not updated, mainly NCCLS (2002). Should be replaced by CLSI (formerly NCCLS) Document M27-A3, 2008. - Regarding the quality of writing, the English must be carefully reviewed since it is poorly written and there are many errors.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
