SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Interesting article describing alternatives for the treatment of diseases caused by fungi such as <i>Candida albicans</i> I recommend improving the manuscript title. The abstract should be in Spanish and English. The summary line 8, majuscule begins with two letters and must be only the first, I recommend removing the methodology and just talk about methodology. Describe the purpose of the study. Describing the 7-hidroxicitronela, Needless to say, it is the main monoterpenes geraniol and is the principal of this essential oils. The methodology on line 64, mentions that the assays were performed in duplicate and they must be in triplicate and three repetitions of each. Tell the wavelength employment for reading 96 microplate wells and device. The results recommend improving the table, shipping example program, I hope it is useful to improve the presentation. In the discussion, I recommend that if you are talking about the 7-hidroxitronela has monoterpenoid fungal activity, avoid mentioning the antibiotics, but tell which are used for this biological activity and 102 missing in this line a point and followed. <i>Candida</i> recommend italicize letters lines 26, 93	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
