SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The main contribution of the current study is the established and confirmed different cause of meningitis, in particular, of bacterial meningitis. In this connection, the necessity of different types for investigation for reveal of the concrete cause/reason in each concrete case with diagnostic signs of meningitis, is very important, for determination of the respective therapeutic strategy, which would be the most effective in the respective clinical case.	
<u>Minor</u> REVISION comments	Despite the current study is based on a review of a large number of clinical cases, diagnosed as Bacterial meningitis, original studies are performed and original results and contributions are received, so, I think that the current paper should be categorized as "Research Article".	
<u>Optional/General</u> comments	Sincerely recommend the current paper be published in the current issue of "International Journal of Tropical Disease & Health", after minor corrections
