SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	The paper is a good attempt to document bacteriological quality of the waste dumps, leachates, soils etc. and the results are on the expected lines. Paper's usefulness will increase if authors provide a map (may not be to the scale) showing all the important features around the landfill and various sampling locations. Further, the discussions could be more elaborative on the inter relationship of various results obtained from different locations which can logically explain why these outcomes have been obtained.	
<u>Optional/General</u> comments
