SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Data Management and statistical analysis: Lines 131&132 are in different fonts. Please make uniformity with other lines. Ref: Three authors should be enough and remove others and write et al after a comma e.g Ref no: 19 Mckenney JL, Goodman R, Wright JT, Rifai N, Aycok DG, King ME Mckenney JL, Goodman R, Wright JT, et al	
<u>Optional/General</u> comments	Very good thought to study which I have been longing to see as an old physician whose drug of choice of hypertension is diuretic which is effective and cheap. Study of metabolic side effects by six weeks seems to be a bit early. Suggest to study every SIX months to Five years
