SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The purpose of the study was to evaluate the efficacy of fluorescence microscopy technique in order to determine sensitivity in detecting tuberculosis among HIV positive and HIV negative patients in poor resource country. Introduction presents background information, and the motivation for this study. Overall, the methodology applied seems appropriate for the purpose and it is already well-established in these types of studies. The research design is clearly explained. Results and discussion are presented with clarity and precision. The bibliography list needs some attention according to journal instructions. The present paper contributes to the diagnosis of the disease.	
<u>Minor</u> REVISION comments	The bibliography list needs some attention according to journal instructions.	
<u>Optional/General</u> comments
