PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Thanks for the effort made, a number of changes have done. However, I am just wondering to see the structuring the paper in a scientific way so that the research world could gain something new from this article.</p> <p>Still there is required revisions in method section which has dilemmas between qualitative and quantitative methods. Authors must aware of socio-demographic data which is quantitative data. I request to re-write again for make it sense.</p> <p>I also request for English editing for the manuscript, it must be at international standard. Authors may hire an English editor for editing the paper.</p> <p>I wish you best of luck and looking forward to see a better version of the manuscript. Thanks</p>
