

SDI Review Form 1.6

PART 1:

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	MS: 2012_IRJPAC_2946
Title of the Manuscript:	Corrosion of Aluminium in Chloride Environments.

General guideline for Peer Review process is available in this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 9 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Actually this type of studies is quite common not revealing anything new on the subject. There are far more better papers dealing with this subject. I find nothing new or worth reporting or publishing.	The interpretation of the results have been improved upon by relating observed potentials with electrochemical mechanism based on Evans theory. SEM of plugging of corrosion sites by Cr^{3+} is novel
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
