

SDI Review Form 1.6

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	2014_IRJPAC_13420
Title of the Manuscript:	CRYSTALLOGRAPHIC AND STRUCTURAL ANALYSIS OF HETEROMETALLIC FeAg COMPLEXES
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. In this review the authors mention only results, therefore, it is a trivial article. It should also be described some opinions of the authors. 2. The authors should explain what it means to the proportion of crystal system (p. 6, l. 263-266). 3. The paragraph (p4, l. 161-175) should make a change to an independent section because it describes the contents of sections 1-5. 4. Explanations of figures are insufficient. For example, general readers do not understand the description regarding Fig. 6, "the skeletal atoms have approximately C₃ symmetry" (p. 5, l. 219-220).	1. No comments 2. we have no serious explanation, this is experimental fact 3. we are not agree 4. from crystallographic point of view, it is clear enough
<u>Minor</u> REVISION comments	1. Some keywords (classification and review) should be changed. These words cannot represent the contents of this article. 2. The section title "7. CONCLUSIONS" should be changed because it is disagreement from the descriptions in this section.	1. changed 2. this section gives a general view on the system FeM and PtM
<u>Optional/General</u> comments	1. The English requires a major revision. 2. Group "1B" should be changed to group "11".	1. done 2. group 1B is quite often used
