

SDI Review Form 1.6

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	2013_IRJPAC_5772
Title of the Manuscript:	Removal of Colour from textile effluent by adsorption using low cost adsorbents
Type of the Article	Research Paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. The current manuscript discussed the color removal using two different types of adsorbents. But the author needs to justify the reason for choosing these materials. 2. The same applies for the chosen dye, why it is being selected in this study. 3. For each of the parameters, more detailed and updated discussion should be included. 4. More parameters should be studied under column mode. 5. The effect should be studied in a wider range. The author should describe also how the pH adjustment was being carried out. 6. More characterization study should be included, especially the pH_{pzc} of the materials. 7. The usage of the capital letters and subscript should be thoroughly checked, there are quite a number of mistakes throughout the manuscript. 8. The submitted work need to be rewritten and thoroughly check as there are quite a number of major English language deficits. 9. A major revision is needed before this can be accepted for its publication in IRJPAC.	Reason is given lines 43-52 Reason is given lines 43-52 Included Shown in line 85-86 Checked and mistakes are corrected Checked and corrected
Minor REVISION comments		
Optional/General comments
