|--------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">International Research Journal of Pure and Applied Chemistry</a>                                                |
| Manuscript Number:       | MS: 2013_IRJPAC_5955                                                                                                        |
| Title of the Manuscript: | Biological evolution and spectral studies of asymmetrical 3,5-disubstituted-1,2,4-oxadiazoles prepared by one-pot synthesis |
| Type of the Article      | Research Paper                                                                                                              |

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:
