SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Authors should rewrite some part of their paper and give only relevant information regarding their findings. 1. Introduction section is too long and looking like mini review. Authors should include only relevant information related to present study. In introduction section of paper from line No. 23 to 18 and line No. 90 to 187 should be excluded. 2. Figure-1 is of poor quality. Include the good quality picture of plant. 3. In materials and methods, following section stating 239 2.6 Experimental Animals 240 Twenty four young male Wistar strain albino rats weighing between 95-130 g of both sexes 241 were obtained from Benue State University, Makurdi, Benue State. Before and during the Authors should clearly mention the use of male or both sexes of Wistar strain albino rats. 4. Figure-4 should indicate control as Diabetic control.	The views expressed here by reviewer are accepted by the authors and corrections effected already. The introduction has been drastically reduced as suggested. We are unable to produce a better quality, if the editorial board strong feel oblige the picture can be excluded. The corrections with respect to the use of male or both sexes of Wistar strain albino rats have been addressed. See 2.6 Experimental Animals. Correction effected
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
