| <b>Compulsory</b> REVISION comments | <p>1. Line numbers should be used for better references</p> <p>This manuscript needs to incorporate more studies on different antioxidants and have them compared to benzoic acid and benzoate. Recommendations are mentioned below. This manuscript is very limited in its focus, and I would not recommend publishing as of now. I believe this study was prepared correctly but not to the extent in which it should have. I would be willing to review this again with additional information that I have mentioned. In the Optional/General comments</p> <p>There are several corrections that must be corrected in the text regarding sentence structure and wording</p> | <p>We follow a number of papers published in inter national journals. Here few of them:</p>  |
| <b>Minor</b> REVISION comments      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                 |

|                                         |                                                                                                                                                                                                                                                                                                       |  |
|-----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| <b><u>Optional/General</u></b> comments | This manuscript has the equivalent information that can be reported by a junior or senior bachelor's student. I believe that more information can be incorporated including other water soluble antioxidants including glutathione, ascorbic acid, and the water soluble vitamin E analogue (Trolox). |  |
