2. Author Reply for Special Query:

These are the conclusions concerning Article 2014/IRJPAC/9586. Identical but are only a few phrases that relate to the composition of the oil (do not know how I can change to same oil) rheologiei important about 2 sentences and materials and methods section. I do not know how I could change something, the oil is the same and the camera all the same. Data interpretation is different as conclusions and references. Waiting for your conclusions. I have attached file to see the differences. Thank you!
