

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	2014_IRJPAC_12459
Title of the Manuscript:	LIQUID LAUNDRY DETERGENTS BASED ON NOVEL POLYMERIC SURFACTANTS

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The experimental part was improved; however the new part seems a protocol and not as a report of what was done. Figures 1 and 2 – There is a lack of resolution in the figures. It is not possible to identify the peaks in Figure 2. Besides that, it is awful to see handwriting on a paper. Please take a look on the author's instructions of IJPAC: "Figures and Tables: All figures (photographs, graphs or diagrams) and tables should be numbered with Arabic numerals and have brief descriptive headings; they should be typed on separate pages after references. Figure parts and footnotes to tables should be identified by lower-case roman letters. The same data should not be given in both tables and graphs." Please read again carefully the manuscript (mainly the experimental details recently added) because there are spellings, uppercase/lowercase errors and spaces missing between some words. Authors could have used others papers to support their discussion. The conclusion should be brief. Please keep discussion and results on its proper place. Authors could also have used other techniques to evaluate the novel polymeric surfactants such as TGA and DSC. More details were added to the experimental section, however this part does not seems a report of what was done. The discussion could have been supported by literature. Figures still lack resolution.	Improved Corrected Just for our understanding we have written NMR spectrum of polymerVI on Fig-1 graph Corrected Okay Okay Added
