

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	2013_IRJPAC_7347
Title of the Manuscript:	Modification of Rice Straw Pulp by Calcium Carbonate/ Microcrystalline Cellulose

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The practical investigation done is worthwhile. However, the grammatical construct was poor. See the manuscript attached for some help provided to improve on the language with the keys: Red suggesting that the author should delete; Blue are my suggestions for the author to add, while the purple represents my occasional comments. On a general note the paper is publishable if those corrections are effected with minimum polishing.	I agree to all corrections written in blue. I delete many things in red colour Lines from 82-95 another reviewer of the same journal suggest to write the company I do not want to delete line 161 ForXRD , the worker who employ the instrument do not give many informations, Lines from 187- 204 I delete from 196 to 199 only ,then line numbers rearranged because I correct on the received copy I correct in line125
