

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	2014_IRJPAC_9869
Title of the Manuscript:	Separation of Palmitic and Palmitoleic Acid and their FAMES using Transition Metal Salts

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. Line 60: Define the abbreviation "FAMES". 2. Line 67: Insert full stop after "[20]". 3. Lines 72 and 79: "its" should read "their". 4. Line 124: Delete colon after "at". 5. Line 222: "error margins" should read "error bars". Note the use of "error margins" in line 229 is correct. 6. Line 225: "is" should read "in". 7. Line 256: "The difference in the case all metal salts is around 8 – 10%" should read "While the difference is negligible in the case of blank solutions, that of the metal salts is around 8 – 10%". 8. Line 267: "won't" should read "will not". 9. Line 330: "Nakai Kextraction" should read "Nakai K. Extraction".	1. abbreviation defined- line 58 2. full stop inserted-line 67 3. corrected –line 79 4. deleted colon after "at"-line 124 5. correction completed –line 223 6. "is" corrected to "in"-line 224 7. correction done –line 256 8. correction done- line 267 9. correction done – line 330
