

SDI Review Form 1.6

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	2013_IRJPAC_8550
Title of the Manuscript:	The characteristics of the of water vapor in micrometer gap sizes
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	It looks like there is typing or file submission error in the title of manuscript. Probably the words "electrical breakdown" were lost in the title.	
<u>Minor</u> REVISION comments	The same as compulsory one. The title does not reflect the subject of the paper.	
<u>Optional/General</u> comments	The article could be more informative if parameters of roughness of electrode surfaces were estimated. The same relates to estimation of such parameters of water, as percentage of its contamination by colloidal metallic nanoparticles. This percentage may increase during experiments due to the discharges.	

Note: Anonymous Reviewer
