

SDI Review Form 1.6

Journal Name:	<u>International Research Journal of Pure and Applied Chemistry</u>
Manuscript Number:	2014_IRJPAC_10301
Title of the Manuscript:	Development and validation of stability indicating HPLC method for simultaneous determination of antidiabetic drugs metformin hydrochloride and glyburide in tablets
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	This article seems interesting. The aim of the study is clear. The manuscript describes the development and validation of metformin hydrochloride (MET) and glyburide (GLY) as well as a stability indicating HPLC method for simultaneous estimation of (MET) and (GLY) in their combined drug product. Study Design: All variables, as well to evaluate the stability and to determinate the stability of these products is submitted to degradation conditions. The results demonstrated that the pharmaceutical forms are precise and accurate to studied conditions attempted. Results analysis showed the method is repeatable, specific and accurate for quantitation of studied drugs. Authors could cited this updated reference: Bonfilio et al. Multivariate Development and Validation of a Stability-Indicating HPLC Method for the Determination of Glimepiride in Tablets Journal of AOA C International Vol. 96, No. 5, pp.960-976, 2013. The method is good enough to be published in the IRJPAC after minor revision.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
