

SDI Review Form 1.6

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	2015_IRJPAC_16459
Title of the Manuscript:	Synthesis and in vitro antimicrobial activity of new Schiff bases of 1,3,4-thiadiazole and 1,2,4-triazole
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	synthetic methods are very similar to: a) Yang, Wen-Long; Wang, Wen-Li; Zhang, You-Ming; Wei, Tai-Bao Phosphorus, Sulfur and Silicon and the Related Elements, 2013 , vol. 188, # 12 p. 1770 - 1777 b) Mobinikhaledi; Jabbarpour; Hamta (2011) Journal of the Chilean Chemical Society, 56, # 3 pp. 812 - 814 at least this two articles must be cited or somewhat accounted in the text	Thank you very much for your valuable comments about our manuscript. In response to the reviewer comment, we have added suggested two articles as references in our manuscript. We hope these responses satisfies the reviewer comment. We would like to thank the Reviewer for helping us making our contribution clearly focused and readable to the audience of the Journal.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Synthesis described in the article is not new; antimicrobial activity is moderate. On the positive side, a visible antimicrobial effect is achieved with some simple compounds. From that point of view the article worth publication.	Thank you very much for your valuable opinion about our manuscript.
